1. PROFESSIONAL SUMMARY

AI and Full-Stack Engineer with proven experience building scalable web applications and security frameworks. Recognized as National Runner-Up at the IIT Madras Hackathon. Proficient in full-stack architecture, machine learning deployment, and cloud API integration.

2. EDUCATION

Bachelor of Technology — Artificial Intelligence and Machine Learning August 2024 – Present
RMD Engineering College

- Cumulative GPA: 7.1 / 10.0

Higher Secondary Education August 2022 – March 2024
Vailankanni Matriculation Higher Secondary School, Veppanapalli

3. TECHNICAL PROFICIENCIES

Programming Languages: Python, Java, C, C++

Frontend & Backend: React.js, Next.js, Tailwind CSS, Node.js, Express.js, TypeScript, Vite

AI Engineering & Security: LLMs, SLMs, NLP, RAG, Model Context Protocol (MCP), Agentic AI, Prompt Engineering, OWASP LLM Top 10 Security, Reinforcement Learning, N8N

Cloud & DevOps: AWS (Bedrock, IAM, VPC, EC2, S3), GitHub Actions (CI/CD), Linux, Vercel

Databases: MongoDB, MySQL

Tools & Frameworks: Canvas API, Google GenAI SDK, Google Search Grounding, FastAPI, Groq API, REST APIs

4. PROFESSIONAL EXPERIENCE

Freelance Full-Stack Developer — Photography Studio Web App April 2026

- Delivered a production-grade studio platform with custom administrative controls.
- Implemented a mobile-first responsive dynamic image gallery interface.
- Developed an administrative asset pipeline enabling non-technical content management.

Core Stack: React, Node.js, MongoDB, Vercel

Freelance Full-Stack Developer — Video Tree Platform April 2026 – Present

- Built a full-stack web application supporting hierarchical video navigation.
- Integrated real-time playback controls with structured database management.
- Configured automated CI/CD deployment pipelines on Vercel with zero downtime.

Core Stack: React, Node.js, Express.js, JavaScript, CSS, Vercel

5. TECHNICAL PROJECTS

FUGEN AI — Virtual Try-On Platform | Independent Project

April 2026 – Present

- Developed a virtual outfit preview application using base64 image processing pipelines.
- Integrated Google GenAI SDK for conversational AI and real-time product search.
- Enforced structural data validation using strict JSON schema definitions.

Tech Stack: React, Node.js, Google GenAI SDK, Canvas API, REST APIs

AI BharatShield — LLM Security Framework | Independent Project

January 2026

- Engineered an automated security testing suite for OWASP Top 10 LLM vulnerabilities.
- Constructed a 5-tier multi-vector attack execution engine with automated evaluation.
- Exposed security assessment workflows via FastAPI REST endpoints.

Tech Stack: Python, FastAPI, Groq API (Mixtral), Pydantic, Uvicorn

Full-Stack Hackathon & Course Platform | Independent Project

January 2026

- Architected a multi-role web platform for course enrollment and hackathon management.
- Designed role-based access control (RBAC) using JWT authentication.
- Structured scalable MongoDB collections to guarantee data isolation.

Tech Stack: React, Node.js, Express.js, MongoDB, Tailwind CSS, JWT

6. HONORS AND CERTIFICATIONS

Key Achievements

- **IIT Madras Hackathon:** Earned National Runner-Up distinction.
- **LeetCode:** Solved 180+ problems focusing on SQL, algorithms, and query optimization.

Professional Certifications

- **Oracle:** Certified Oracle Generative AI Professional | Oracle Apex Cloud
- **Google Cloud:** Agentic AI Day | 20+ Skill Badges Earned
- **GitHub Skills:** Secure Code Game Completion (Seasons 1–3)
- **OWASP:** LLM Security Labs (10/10 Completed)
